

## New storage facilities- Isla Melones

**Client:** MELONES OIL TERMINAL INC.(MOTI)

**Location:** Panama

**Scope:** E, DI, GC

**MH:** 30.000

**Description:** Expansion the storage capacity.

The scope of contract shall be executed in three (3) stages.

Stage I: Feasibility study, comprising two (2) main objectives:

- Determine the maximum capacity of foundation support where new facilities shall be installed and recommend the required improvements (if needed) to obtain an appropriate foundation that allows the implementation of this Project.
- Determine which is the major storage capacity for the new landfill, based on the minimum installation capacity BPD.

Stage II: Detailed engineering for the installation of new storage facilities in the following areas:

- Storage Patio, including tanks and dams.
- Connection of new signals to the existing Control room.
- Road Access and drainage systems.
