

EPC Cluster expansion

Client: PDVSA Petrocededño

Country: Venezuela

Scope: EPC

Disciplines involved: Mechanical, Electricity, Instrumentation & Control, Process, Piping and Civil.

Description: Expansion of heavy crude oil production capacity.

OTEPI y SADEVEN en consorcio realizaron la elaboración de la Ingeniería, Procura, Construcción, Pre-commissioning y Commissioning para la ampliación de las instalaciones de superficie asociadas a seis (6) clusters, poniendo en funcionamiento y operación nuevos pozos en un esquema fast-track.

The surface facilities, comprised mechanical, electrical and instrumentation & control connections of 67 new oil-wells. Also, as a part of the scope, the Power & Control Cabinets were enlarged and new air compressors of instruments and service were installed.
